

Donaldson®  
FILTRATION SOLUTIONS

# 10 WAYS

to make sure you get the  
**RIGHT SYSTEM FOR YOUR APPLICATION**

To help guarantee the best solution for your needs, here are some issues to discuss with your Donaldson representative:

- 1.** Characteristics of the airborne contaminants generated by your application
- 2.** Volume of particulate generated
- 3.** Disposal and/or reclamation needs
- 4.** Plant layout and space requirements or restrictions
- 5.** Need for recirculation of heated or cooled air
- 6.** Airflow requirements (cfm)
- 7.** Static pressure and conveying velocity of ducted systems
- 8.** Level of air filtration efficiency needed (micron vs. sub microns)
- 9.** Safety and maintenance requirements (fire proofing hazardous materials etc)
- 10.** Future collection requirements
